Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

The pair of two-story, two-bay wide late Italianate-style brick houses with shed roofs and wooden scroll-sawn bracketed cornices are the only survivors of a row that once extended from 1823 – 1841 Dover St., built c. 1888. They are typical of a type of small-street house built especially in southwest Baltimore, that are only two-rooms deep but sit on very high basements, in which the kitchen was located. The houses retain their original brick facades, which were always painted.

The houses are two stories in height, 12'6" wide and occupy lots 40' deep. Each house is two rooms deep and there is no backbuilding. The houses are constructed in running bond and were originally painted. Each house has a single hooded chimney located at the rear corner of the house. The shed roofs are capped by a wooden cornice consisting of a crown molding supported by three long scroll-sawn brackets decorated with grooves, connected by a lower molding strip, and ending with a distinct trefoil pattern. The frieze panel, which also serves as ventilation for the attic, is elaborately decorated with circular jig-sawn motifs as well as two projecting bull's-eye carvings, one centered between each long bracket.

The tall, narrow window and door openings have narrow wood lintels and sills. One set of the original 2/2 sash survive; the other windows have 1/1 replacement sash or have been boarded over. The doorways originally had a single-light transom, but this has been covered over and the door is a modern replacement. The houses sit on very high basements, that can be entered directly from the street. The houses were originally reached by seven wooden steps, set parallel to the facade.

In terms of floor plan, each house is only two rooms deep on a shallow lot, with the kitchen located in the basement.

8. Significance

Builder/Architect

Prepare both a summary paragraph of significance and a general statement of history and support.

This group of houses significant as representing the level of architectural stylishness builders were willing to give to small street houses in the late nineteenth century and is testament to the fact that there was no stigma attached to small street living. They represent a form of house particular to southwest Baltimore—only two rooms deep with the kitchen located in the basement—a design that allowed builders to build on much shorter lots. The houses were built according to a pattern that was quite common to the city's working class neighborhoods of the period c. 1870 to 1910. Recognizing that workers held different levels of jobs (and pay), builders created a hierarchy of house sizes (and prices) in the new neighborhoods going up to serve the expanding factory districts ringing the harbor and northeast and southwest of the central city. Builders acquired anywhere from an eighth to a half of a city block and built 14' to 15'-wide three-bay-wide, two-story houses on the main streets, and smaller, 11' to 13'-wide two-bay-wide, two-story houses on the narrower streets bisecting the blocks. Typically, in this period, main street houses might sell for \$1,200 - \$1,500; small street houses for \$700 - \$900.

Occasionally, the builder retained ownership of his small street houses to provide income for himself as rental properties. In this way people of varying means could afford to live in the same block. If they couldn't afford the approximately \$750 purchase price of the small street houses, then they *could* afford the \$8 or so a month it would cost to rent one, while they saved to be able to buy their own home later.

The houses are especially significant because of their proximity to the slaughterhouses of southwest Baltimore and their related industries, particularly the William Wilkens & Co. Curled Hair Manufactory, one of the largest employers in the area. A number of German-American owned breweries were also located in this section of the city. Moderately-priced housing was built to provide homes for the mainly German immigrants who came to southwest Baltimore to work in these rapidly expanding industries in the decades after the Civil War.
